

**RICE VERIFICATION
PROGRAM**

MAY 24, 2024

General Information

The first fertilizer applications were applied to two of the three fields ahead of the rainfall that was received during the week of May 20 - May 26. It feels like we're playing cat-mouse between the unfavorable winds and rain forecast to finish the herbicide applications on the Mississippi Co location.

Table 1. Verification field information for the weeks of May 19th - May 25st.

County	Cultivar	Planted/Rate/ Stage	Agronomic Details
Mississippi Sharkey Clay	RT XP753* (FIR)	4/1/24#/ 3-tiller.	Fertilized with 163 lbs of Urea on 5/20 Furrows were pulled on 5/21. Forecast has delayed herbicide applications.
Stoddard (McMeans) Silty Loam	RT 7521 FP* (FIR)	4/15/22# 2-tiller.	Applied Preface (4 oz) + Prowl (1 qt) + 1 % COC on May 20th Applied Gambit (1 oz) only along border of the western & crown of field. Fertilized with 163 lbs of Urea on 5/21.
Stoddard (Schuchart) Clayey Loam	DG263L+ (FIR)	4/23/40# 5-Leaf	

*RiceTec Seed Treatment which insecticide, fungicide, zinc, and gibberellic acid.

+Dyna-Gro Seed Treatment which insecticide, fungicide, zinc, and gibberellic acid.

This project would not be possible without the cooperation of the following individuals, Ben Ray, Brandon Copeland, Jennifer and Oliver McMeans, John Davis, Cody Placher, and Paul Schuchart.
