

## General Information

One field Stoddard (Schuchart) had a small hot spot area on the western side of the field. The Grower was informed and planned to shovel the furrows to help with irrigation. We're continuing to monitor disease and insect levels. We will see what ends up happening with Hurricane Beryl pushing rain into the region.

Figure 1. NOAA 7-Day precipitation forecast.

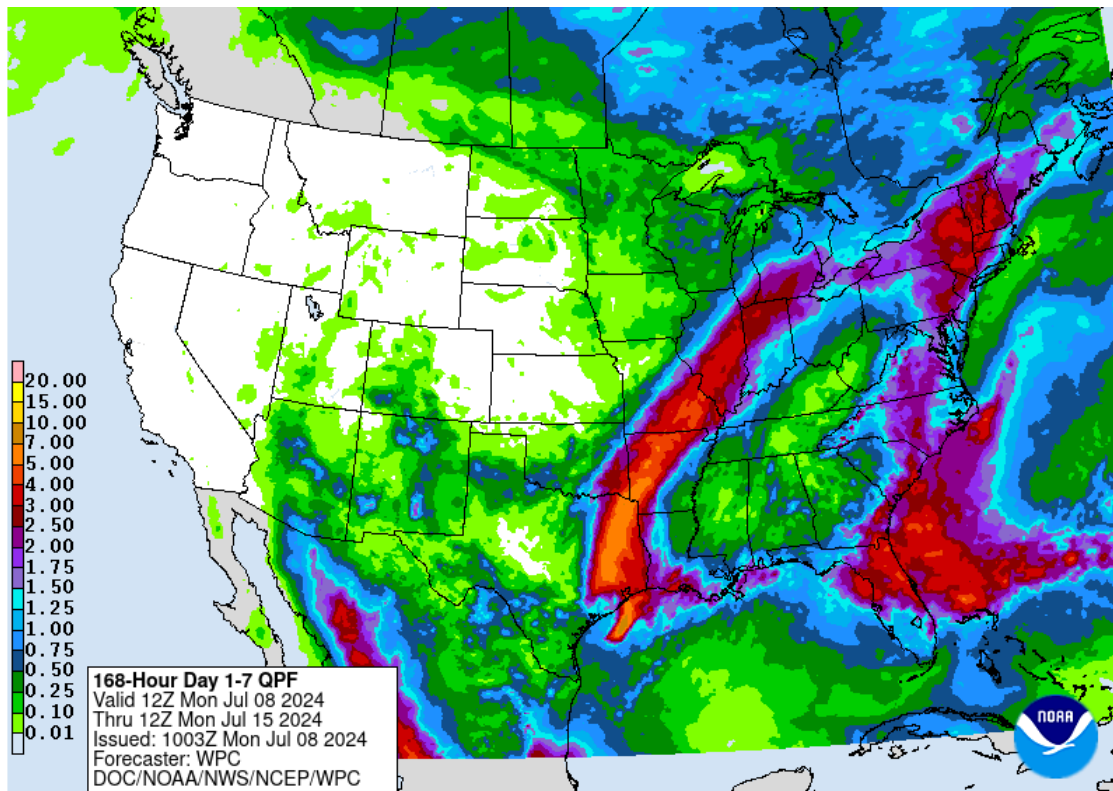

Table 1. Verification field information for the week of June 30th - July 6th.

County	Cultivar	Planted/Rate/Stage	Agronomic Details
Mississippi Sharkey Clay	RT XP753* (FIR)	4/1/24#/ 3- inch IE	
Stoddard (McMeans) Silty Loam	RT 7521 FP* (FIR)	4/15/22# 3-inch IE	
Stoddard (Schuchart) Clayey Loam	DG263L+ (FIR)	4/23/40# 1 inch IE	Recommend shoveling a few furrows on the western side of the field for better irrigation flow.

\*RiceTec Seed Treatment which insecticide, fungicide, zinc, and gibberellic acid.

+Dyna-Gro Seed Treatment which insecticide, fungicide, zinc, and gibberellic acid.

This project would not be possible without the cooperation of the following individuals, Ben Ray, Brandon Copeland, Jennifer and Oliver McMeans, John Davis, Cody Placher, and Paul Schuchart.
